

# Replay Top with Tinted Side and Rear Windows and Upper Door Skins

Installation Instructions

For: Jeep Wrangler (YJ)

1988 – 1995

**Part Number: 51132**

## Installation Tips

Before you begin installing this assembly, read all instructions thoroughly.

### For a smooth fit:

For ease in installation, the product should be installed at temperatures above 72° F. Below this temperature, the fabric may contract an inch or more, making it difficult to fit to the vehicle. It is normal for fabric to contract and wrinkle when stored in the shipping carton. Within a few days after the installation, the fabric will relax and the wrinkles will disappear.

## WARNING

This product is designed to enhance the appearance of the vehicle. Do not rely in any way on the components of this product to contain occupants within the vehicle, or to protect against injury or death in the event of an accident. Never operate vehicle in excess of manufacturer's specifications.

### WEAR SEAT BELTS AT ALL TIMES

Read and follow, precisely, all installation instructions provided when installing this product. Failure to do so could place occupants of the vehicle in a potentially dangerous situation. After installing or reinstalling, check to make sure it has been properly installed.

## Step Eleven

### SNAP TOP

Fasten snaps on top, above doors, to studs on vehicle. Studs will slide to match location of snaps on top.

## Step Twelve

### REMOVE OLD DOOR COVERS

Unfasten the plastic retainer at the bottom of the fabric door and remove it from the vehicle. Use a razor knife to cut the stitches on the old door covers and remove them from the door frames.

## Step Thirteen

### INSTALL DOOR COVERS ON FRAME

Separate the hook and loop fasteners on the door covers and slide the new cover onto the frame, starting at the top. Work from corner to corner, wrapping the fabric around the frame and fastening the hook to the loop as you work around the door.

## Step Fourteen

### REINSTALL DOORS ON VEHICLE

Reinstall the upper doors. Insert the pins into the grommets in the lower door.

## Step Fifteen

### SECURE UPPER DOORS

Fasten the snap at front of upper door. Slip plastic strip on the bottom of the soft door into the retainer on the steel door.

## Care and Maintenance of your New Top

Your top is made of the finest materials available. To keep it looking new and for the maximum possible wear, it will need periodic cleaning and maintenance.

**Washing:** The fabric should be washed often using soap, warm water and a soft bristle brush. Rinse with clear water to remove all traces of soap.

**Zippers:** Keeping the zipper cleaned and lubricated with a silicone lubricant will help prevent damage and keep the zippers in a smooth working condition. If a zipper opens behind the slider, the slider may have been spread apart. This problem can usually be repaired by using an ordinary pair of pliers to bring the sides back into parallel. Return slider to the end of the zipper in the normal Open position. Squeeze lightly at first and test the zipper. If the zipper continues to remain open squeeze more firmly with the pliers and try the zipper again. Repeat this procedure until the zipper operates correctly.

**Water:** In the event of seeping through the seams, 3M Scotchgard® may be applied on the inside of the seams to stop the seepage. Rips in the fabric may be repaired with Bondex® iron on patches. Iron the patches to the Inside of the top, carefully following the Bondex® instructions.

**Snap:** Keep snaps cleaned and lubricated with silicone to help prevent snaps from sticking to the studs. If a snap does become stuck to a stud, use a screwdriver and GENTLY pry apart to prevent permanent damage to the snap or the top fabric.
