Duster Deck Cover Installation Instructions

For: Jeep® Wrangler 2003
with Factory Hard Top

Part Number: 90022

DO NOT INSTALL THIS PRODUCT ON ANY VEHICLE OTHER THAN THOSE LISTED ABOVE.

This product is only designed for the vehicles listed above. Failure to install this product on the proper vehicle could cause injury to the vehicle occupants and damage to the product.

WARNING

This product is designed to enhance the appearance of the vehicle. Do not rely in any way on the components of this product to contain occupants or cargo within the vehicle, or to protect against injury or death in the event of an accident. Never operate vehicle in excess of manufacturer's specifications.

WEAR SEAT BELTS AT ALL TIMES

Read and follow, precisely, all installation instructions provided when installing this product. Failure to do so could place occupants or cargo of the vehicle in a potentially dangerous situation. After installing or reinstalling, check to make sure it has been properly installed.

Installation Tips

Before you begin installing this product, read all instructions thoroughly. Below are a few tips to make this installation easier. After completing the installation, keep these instructions for further reference.

For a smooth fit:

For ease in installation, the Duster should be installed at temperatures above 72° F. Below this temperature, the fabric may contract an inch or more, making it difficult to fit to the vehicle.

It is normal for the fabric to contract and wrinkle when stored in the shipping carton. Within a few days after the installation, the fabric will relax and the wrinkles will disappear.

Installation

Step One

INSTALL TAILGATE RETAINER MOUNTS

Locate the left and right Tailgate Retainer Mounts. Place the mounts flush with the edge of the tailgate opening. Install the Tailgate Retainer Mounts with two #8 x 1/2" Pan Head Washer Screws for each mount.

If your vehicle does not have holes at this location, align the Tailgate Retainer Mounts flush with the edge of the tailgate opening. Then mark the locations of the holes in the mounts, center punch and drill a 1/8" hole at the marked locations. Install the mounts with two #8 x 1/2" Pan Head Washer Screws for each mount.

Caution

Safety glasses should be worn at all times while installing this product.

Note: This product is designed for a "Custom Fit".
Be patient during the installation, it fits tight!

Step Two

SECURE REAR SEAT

Locate the Web Buckle Strap in the parts kit. Thread the web end of the strap through the footman loop closest to the rear of the seat on the Driver's side. Fold the back of the seat down and thread the web through the bar on the seat back. Thread the end of the strap through the buckle and pull it tight. Tightening the strap securely will keep the seat from banging when the vehicle is moving.

Step Three

INSTALL TAILGATE BAR

From the back of the vehicle, hold the Duster with the backing side toward you. Orient the Tailgate Bar with the rubber bulb facing down, in order to form a seal with the top of the tailgate. Slide the groove in the Tailgate Bar onto the tube inside the rear of the Duster. Roll the Tailgate Bar into the top of the Tailgate Retainer Mounts.

Step Four

SECURE WEB STRAPS

Drape the fabric forward over the rear of the vehicle and locate the web straps, with buckles attached, on the front of the Duster. Wrap the straps around the front sport bars and thread the ends loosely through the buckles. Do not pull the straps tight at this time.

Step Five

SECURE PLASTIC STRIPS

Locate the plastic strip sewn to the Duster along each side of the vehicle. Start at one end on each side and roll the plastic strip into the Side Retainers.

Step Six

SECURE REAR CORNERS

Roll the plastic strips, sewn into the rear corners of the Duster into the Corner Retainers. Slide the corner plastic strip toward the front of the vehicle and make sure that the plastic strip fits up into the retainer so that the collar fits properly.

Note: The Plastic Protector sewn into the fabric must be located over the Tailgate Retainer Mounts.

Step Seven

SECURE COLLARS

Tuck the seat belt assemblies into the rear sport bar collars and close the rear sport bar collars by pulling firmly on the fabric and fastening the Hook and Loop Strips to each other. Tighten the straps on the front of the Duster.

To Remove Duster

When removing the Duster, use the loops sewn to the fabric to release the plastic strips. Pull gently down, then straight out to release the plastic strip from the retainers.

If You Have a New Windjammer on Your Vehicle Optional Installation

Step One - Optional

Locate Attaching Snaps from Hardware Kit supplied with the Windjammer.

Step Two - Optional

Locate the flap sewn to the vinyl side of the Windjammer. Pull the flap out over the top of the front edge of the Duster.

Step Three - Optional

Pull up on the front, reinforced edge of the Duster and mark the locations matching the three snaps on the Windjammer flap, on the webbing along the top of the Duster.

Step Four - Optional

At the marked locations, push the sharp end of a Snap Head Screw through the Duster from the webbing side, to make a hole. Once a hole is formed, pull the screw back out of the hole. Then push the screw through the hole from the vinyl side so that the snap is on top of the vinyl. Thread an Acorn Locknut over the pointed end of the Snap Head Screw. Snap the Duster and the Windjammer together with the three snaps.

Care and Maintenance of your New Duster

Your Duster is made of the finest materials available. To keep it looking new and for the maximum possible wear, it will need periodic cleaning and maintenance.

Washing: The fabric should be washed often using soap, warm water and a soft bristle brush. Rinse with clear water to remove all traces of soap.

Water: Seeping through at the seams may be stopped by applying 3-M Scotchgard® on the inside of the seams. Rips in the fabric may be repaired with Bondex® iron on patches. Iron the patches to the Inside of the top, carefully following the Bondex® instructions.

Snaps: Keep snaps cleaned and lubricated with silicone to help prevent snaps from sticking to the studs. If a snap does become stuck to a stud, use a screwdriver and GENTLY pry apart to prevent permanent damage to the snap or the top fabric.
